

A Value Add in a Time of Need

Through our partnership with HealthStream, Medline has curated 21 COVID-19 staff training courses and made them available on our Medline University platform at no cost. My hopes that this can be shared throughout your network to utilize as a resource.

Below are step by step instructions on how to access these **COMPLIMENTARY** modules via Medline University. Refer to *steps 2-4* if your organization *doesn't* have an existing Medline University account. Please feel free to share this with your staff so they can register and access this library too.

1. Click: <https://www.medlineuniversity.com/sign-in>
2. Choose the **If you do not have a Medline account** option.
3. Choose the state you work in.
4. Complete the form and click submit.
5. You will be directed to the ***To-Do*** tab of your Medline University page. Click **Find an Elective in the Catalog**.
6. Type **Covid-19** in the search bar for the 21 modules to appear.
7. Click the module title you'd like to review.
8. Click the **Enroll** button.
9. The course will appear and can now be accessed on your ***To-Do*** tab.
