Description:

The PDGM is the most comprehensive change to the home care regulatory requirements for reimbursement since the introduction of the current Prospective Payment System (PPS) in October 2000. The new payment model, that went into effect January 1, 2020, has huge implications for operational, clinical and financial processes and performance. This program will encompass a review of the impacts of the PDGM including the effect of the 30 day payment period on billing and back office processes, the importance of accurate coding on establishing the HHRG, the significance of OASIS accuracy, and how a solid clinical management program is essential to ensure patients are receiving appropriate, cost-effective quality care. This program will assist agencies with understanding the forthcoming changes, developing strategies, and implementing processes for a successful transition into PDGM.
